

A Constellation Financial Software Company

# Optimize efficiency and boost business through automation

## Web-based & mobile-friendly

- Mobile-friendly user interface
- Vendor, broker, borrower and lender portals
- Products natively support remote sales distribution networks

**Access web-based lease and loan origination solutions anywhere through your browser. Work from home, the office, the road...anywhere!**

## Customizable & scalable

- Custom development platform
- Rapid deployment of custom features
- Offerings scale to meet your business needs

**Dynamic workflow engine for business process and data management. Development platform facilitates changes tailored to your unique business processes.**

## Data security

- SOC1 Type II & SOC 2 Type II Audits
- Multi-factor authentication
- Third-party penetration tests
- Regular security scans

**Benefit from an industry leading database management system. Conforms to all security requirements typically requested by credit agencies, banks and other lending institutions.**
