

# Running a legacy app?

It's time to **EVOLVE**.

## How can **EVOLVE** help you?

A **three-phase** journey that involves:

- 1** Modernizing web applications that are internal or external facing.
- 2** Modernizing your apps with Azure PaaS Services.
- 3** Working with a Microsoft partner throughout the journey.

## What are the **benefits**?

-  Future-proof your legacy apps while leveraging the power of Azure PaaS Services
-  Get support and guidance every step of the way
-  Get a free assessment, hands-on workshop and architectural design session
-  Achieve cost savings

Your cost: **\$5K CAD** = up to **87%** discounted offer  
 (up to \$37,500 CAD total value)

## How does it work?

### Phase 1: Discovery

- 1** App modernization assessment identifies which apps to prioritize for Cloud modernization using the PaaS compute model
- 2** Determine the app integrations and code changes needed to modernize to Azure.
- 3** Your Microsoft partner will schedule you for the In-a-Day workshop

#### You get:

1. Detailed assessment report
2. Free skilling by attending a web app modernization workshop
  - Learn the steps involved in modernizing legacy on-premise applications and infrastructure by leveraging cloud services.
  - Become better enabled to deploy and configure Azure web apps and associated services.

### Phase 2: Architectural design session

- 1** Review the assessment report with your Microsoft partner and determine next steps.

#### You get:

1. Architectural guidance
2. Consultation on preferred practices
3. Risk analysis

### Phase 3: AIM | Accelerate

- 1** Six-week PoC: your partner will help you move your web app into Azure via PaaS

#### You get:

1. Configuration & deployment of web application resources
2. Configuration of Azure DevOps, deployment pipelines & environment prerequisites
3. Web application code and components remediated or refactored for modernization into Azure
4. Web application running and supported in production environment
5. Documentation & handover

## Why modernize with **Azure**?

-  Save costs: **466% ROI**
-  Enhance speed: **50% faster service deployment**
-  Spur innovation: **80% IT time saved**
